

Plan A and B

Plan A

Film: The Dark Knight

Scene: Conversation between Jim Gordon and The Joker

Screenshots:

We would be replacing the character of Jim Gordon. Below are the screenshots of the scene.

Reason for Choice: We choose this scene due to the background lighting being different to the lighting at the table. Also the change of when he is not at the table to the door.

Changes: We are going to have to add more action for our character due to in the film he only sits down where at the table. Therefore if we want a variety of shots we need more movement of the character. Also we are going to create a scene before he enters the integration room, where he speaks to one of his colleague about what has happen earlier in the movie. This will therefore show interactivity between two characters and a different lighting scene to.

Plan B

Film: Paranormal Activity

Scene: Bedroom scene where Katie throws Micah at the camera

Screenshot:

Would replace Katie

Reason for Choice: The reason why this would be our Plan B is that it supposes to look like night vision from the camera, which we would have to recreate though lighting and gels. This would be interesting trying to match. It is not our first choice due to there being shadow and not as challenging as *The Dark Knight*.

Changes: We would have to create a garden scene where various movements happens and kids toys would move by themselves to make it more interesting.
